May 12, 2008

Dear Airport Neighbor and Other Interested Parties,

I am writing to advise you of events that will be happening at Ted Stevens Anchorage International Airport during this summer's construction season. The Airport will be closing various runways and taxiways this summer to complete needed improvements, repairs and maintenance including asphalt repair and taxiway construction. As a result, flight patterns not normally used and greater frequency of flights over the community may be observed.

The required maintenance will close the following Runways 24 hours a day. Please understand that wind and weather conditions may alter this schedule.

Runway Closure

Dates

Runway 7R/25L (East/West Runway – Southern)	May 12 – May 18
Runway 7L/25R (East/West Runway – Northern)	July 11 – Aug 10

Also, this summer, runway work at Elmendorf Air Force Base will require some of their operations to move to ANC. As a result you may observe aircraft and aircraft operations not normally seen, as the Air Force's E-3 Airborne Warning and Control System (AWACS) aircraft will be operating out of ANC. For more information regarding AWACS operations at ANC, feel free to call Elmendorf's Public Affairs Office at 552-8151.

As always, weather and wind conditions may change runway configurations here at ANC. During times of prevailing weather, there may be an increase in aircraft activity over the Anchorage area. The Airport recognizes there will be temporary noise impacts on the community and wants the public to understand the reasons for the temporary summertime increase in aircraft noise. The Airport, FAA, Air Force and the Airlines appreciate your patience during these repairs to the runway systems. For further information on the Airport's construction activities, call the Noise Hotline at 266-2648 or visit our website at www.anchorageairport.com.

Sincerely,

A handwritten signature in blue ink that reads "Theresa".

Theresa Maser

ANC Noise Program Manager
